For governments a net-zero target is one that covers all scope 1 emissions in their jurisdiction. For business it usually covers scope 1 and 2 emissions, although some companies also include some scope 3 emissions. The Science Based Targets Initiative is currently working on a standard for companies. roadmaps, to reduce emissions moREnewable100 (RECs & Offsets) Reach Global Sustainability Goals with Renewable Energy Certificates and Carbon Offsets Trade RECs & Carbon with us Trade Local & International Environmental Attribute Certificates Climate Active Achieve Climate Active Carbon Neutral Certification Net Zero Roadmaps Identify opportunities and build achievable pathways Carbon and Energy Strategy Integrate your carbon and energy strategies NGERS Reporting National Greenhouse Emissions Reporting Grants and Programs Review the latest grants and programs Energy Close Energy Open Energy Energy We offers comprehensive energy services, focusing on efficiency improvements, cost reduction, monitoring, benchmarking and strategic sourcing for sustainable and positive environmental impacts Grants and Program Review the latest grants and programs Energy Audit & Assessments Identify cost and emissions reductions Energy Optimisation Metering & Monitoring, Feasibility Studies, EnMS and ISO50001, & Benchmarking Strategic Energy Sourcing Feasibility & Assessments: Renewables, PPAs or Certificates Compressed Air Services Air Compressor Leak Audits, Surveys and Benchmarking EEO Assessments (SG) Singapore Energy Efficiency Assessments Energy Procurement Navigate energy markets with confidence Virtual Environmental Manager Leverage our teams wide experience Certificates Close Certificates Open

Certificates Our Environmental Attribute Certificate services help businesses accelerate technology adoption, improve project ROI, and manage claims of renewable energy, energy efficiency and carbon offset 1 carbon offset = 1 tonne of CO₂-e avoided or removed from the atmosphere. Avoided emissions covers activities that alter behaviour that would have otherwise caused emissions such as energy efficiency improvements or avoided deforestation. Removal covers activities that permanently remove CO₂ from the atmosphere such as new forestry plantations, soil carbon improvement or carbon capture and storage.

Glossary Define key terms in emissions reduction. 5 Reasons to set a carbon target now Northmore Gordon May 18, 2021 Articles Share this article Resilience against future regulation – all states have net-zero by 2050 targets and Victoria just announced the interim target of 50% reduction by 2030 Future-proof your organisation – carbon costs should be incorporated into all investment decisions Drive innovation – with a carbon target your organisation can be incentivised to find better ways to operate Save money – environmental charges are on the rise and this cost is passed through to you via your electricity retailer Gain investor/customer confidence – investors and customers are already asking questions about what companies are doing to reduce their carbon footprint. Can you afford to lose them? It is clear that there will be a competitive advantage for those who are prepared for the transition to the low carbon economy. Not sure where to start? We can facilitate a complimentary carbon health check for your management team to understand where your business needs some extra focus. Give us a call and we can arrange a time for this to be done either virtually or in person. Otherwise, try our online carbon health check ! The setting of targets is just one element of a complete carbon strategy as can be seen in the infographic below. If you aren't sure where to start on your carbon strategy journey, or you have begun in a piecemeal fashion, we can run a complimentary carbon strategy benchmarking session with your management team to highlight areas where there are gaps, and develop a measured plan to filling them.
