For governments a net-zero target is one that covers all scope 1 emissions in their jurisdiction. For business it usually covers scope 1 and 2 emissions, although some companies also include some scope 3 emissions. The Science Based Targets Initiative is currently working on a standard for companies. roadmaps, to reduce emissions moREnewable100 (RECs & Offsets) Reach Global Sustainability Goals with Renewable Energy Certificates and Carbon Offsets Trade RECs & Carbon with us Trade Local & International Environmental Attribute Certificates Climate Active Achieve Climate Active Carbon Neutral Certification Net Zero Roadmaps Identify opportunities and build achievable pathways Carbon and Energy Strategy Integrate your carbon and energy strategies NGERs Reporting National Greenhouse Emissions Reporting Grants and Programs Review the latest grants and programs Energy Close Energy Open Energy Energy We offers comprehensive energy services, focusing on efficiency improvements, cost reduction, monitoring, benchmarking and strategic sourcing for sustainable and positive environmental impacts Grants and Program Review the latest grants and programs Energy Audit & Assessments Identify cost and emissions reductions Energy Optimisation Metering & Monitoring, Feasibility Studies, EnMS and ISO50001, & Benchmarking Strategic Energy Sourcing Feasibility & Assessments: Renewables, PPAs or Certificates Compressed Air Services Air Compressor Leak Audits, Surveys and Benchmarking EEO Assessments (SG) Singapore Energy Efficiency Assessments Energy Procurement Navigate energy markets with confidence Virtual

Environmental Manager Leverage our teams wide experience Certificates Close Certificates Open Certificates Certificates Our Environmental Attribute Certificate services help businesses accelerate technology adoption, improve project ROI, and manage claims of renewable energy, energy efficiency and carbon offset 1 carbon offset = 1 tonne of CO₂-e avoided or removed from the atmosphere. Avoided emissions covers activities that alter behaviour that would have otherwise caused emissions such as energy efficiency improvements or avoided deforestation. Removal covers activities that permanently remove CO₂ from the atmosphere such as new forestry plantations, soil carbon improvement or carbon capture and storage. certificates Live Certificate Prices The value of certificates change day-to-day, check today's prices Solar VEECs (VEU PBA) VEU PBA for Large-scale Solar Measurement & Verification (VEU & ESS) M&V; for Large C&I; Efficiency Projects (VEU PBA & ESS PIAM&V;) BESS Calculator Estimate the Peak Reduction Certificate revenue available to your NSW battery project in minutes ERF & Carbon Credit Registration ACCUs for Emission Reduction Projects Boiler Upgrades (VEU & ESS) NSW & VIC Boiler Rebates REC Registration (I-RECs & LGCs) Register renewable assets for I-RECs and LGCs Trade RECs & Carbon with us Trade Local & International Environmental Attribute Certificates moREnewable100 (RECs & Offsets) Reach Global Sustainability Goals with Certificates and Offsets Deemed Certificates (VEU & ESS) NSW & VIC Rebates Global Certificates Environmental Attribute Certificates Australian Programs Australian EAC Programs Case Studies Sectors Articles Team More Close More Open More Northmore Gordon Learn more about Northmore Gordon with the latest news and insights, were to find us, and the extensive terminology used in emissions reductions About Us Who we are & what we do in energy efficiency & decarbonization. Advice That Executes – Premium Service, Practical Results Northmore Gordon August 15, 2025 Articles Share this article In the high-stakes world of energy transition, good advice isn't enough. Businesses don't just need strategies – they need outcomes. Whether you're planning a heat pump retrofit, mapping your net zero roadmap, or navigating a complex regulatory framework like NGERs, success hinges on one thing: execution. Too often, consulting firms deliver glossy reports that sound great but fall apart under real-world pressures. Timelines slip. Risks are underestimated. Budgets overrun. Why? Because the people writing the advice aren't the ones who have to make it work. At Northmore Gordon, we do things differently. Our premium service model ensures that every piece of advice we provide is built to be executed – efficiently, accurately, and with measurable impact. Closing the Execution Gap In traditional energy consulting, there's a well-known flaw: the advice-execution gap. • Consultants produce plans, but don't take responsibility for implementation. • Junior staff handle delivery, lacking the experience to anticipate practical challenges. • Generic templates get repurposed, regardless of your industry, plant configuration or budget constraints. This approach delays progress and drives up cost. Worse, it puts your regulatory and financial outcomes at risk. Northmore Gordon bridges this gap. Every strategy we design is: • Engineered by senior experts with real-world project delivery experience • Aligned to your compliance obligations, operational constraints, and capital planning • Backed by models and data that withstand board-level scrutiny We don't just offer advice. We help you make it work. What Premium Expertise Service Actually Means "Premium Expertise Service" isn't about size. It's about how we work. At Northmore Gordon, premium expertise service means: • Direct access to named senior experts, not layers of account managers. • 48-hour response times on key questions and advice. • Implementation-ready deliverables: detailed business cases, feasibility models, certificate strategies and compliance roadmaps. • Boardroom-ready support: we help you present technical outcomes in language your executives and investors understand. Our clients don't wait weeks for responses. They don't chase generic reports. They get clear, practical guidance from people who take ownership. Turning Strategy into Action: Click the links below to see successful Case Studies. • Greenham Moving Towards Decarbonisation • Bulla Dairy's Boost Efficiency and Reduces Waste • Molycop Strives for Greater Sustainability Advice is only valuable if it leads to action. That's the Northmore Gordon difference. Practical Results, Not Just Theoretical Advice Our work routinely delivers: • Faster project

cycles: Up to 30% shorter audit or funding application timelines • More funding: Certificate optimisation strategies that deliver 20-35% more value • Fewer risks: Strategic compliance planning that has helped clients avoid six-figure penalties Our business cases have unlocked over \$250 million in funded energy and emissions projects across Australia. Why This Matters to Your Role Whether you're a: • CFO who needs confidence in ROI, cashflow and risk • Sustainability Manager looking to deliver credible emissions outcomes • Engineering or Site Manager needing solutions that actually work in your facility You need advice you can trust – and execute. Northmore Gordon provides both. Execution-Ready, Every Time Unlike firms who disappear after delivering a report, we stay engaged until your strategy becomes a success story. Our advisory model includes: • Regulatory compliance that passes audits and unlocks capital • Certificate strategies that survive market swings • Engineering designs that are operationally viable • Energy roadmaps that CFOs approve and boards fund In short: we help you do more with less delay, risk and missed opportunity. If you're planning your next energy or emissions project, let's talk about how our senior team can help you get from strategy to execution faster. Because in energy consulting, premium advice isn't about prestige. It's about practical results that protect your bottom line. Let's have that conversation.
