For governments a net-zero target is one that covers all scope 1 emissions in their jurisdiction. For business it usually covers scope 1 and 2 emissions, although some companies also include some scope 3 emissions. The Science Based Targets Initiative is currently working on a standard for companies. roadmaps, to reduce emissions moREnewable100 (RECs & Offsets) Reach Global Sustainability Goals with Renewable Energy Certificates and Carbon Offsets Trade RECs & Carbon with us Trade Local & International Environmental Attribute Certificates Climate Active Achieve Climate Active Carbon Neutral Certification Net Zero Roadmaps Identify opportunities and build achievable pathways Carbon and Energy Strategy Integrate your carbon and energy strategies NGERS Reporting National Greenhouse Emissions Reporting Grants and Programs Review the latest grants and programs Energy Close Energy Open Energy Energy We offers comprehensive energy services, focusing on efficiency improvements, cost reduction, monitoring, benchmarking and strategic sourcing for sustainable and positive environmental impacts Grants and Program Review the latest grants and programs Energy Audit & Assessments Identify cost and emissions reductions Energy Optimisation Metering & Monitoring, Feasibility Studies, EnMS and ISO50001, & Benchmarking Strategic Energy Sourcing Feasibility & Assessments: Renewables, PPAs or Certificates Compressed Air Services Air Compressor Leak Audits, Surveys and Benchmarking EEO Assessments (SG) Singapore Energy Efficiency Assessments Energy Procurement Navigate energy markets with confidence Virtual Environmental Manager Leverage our teams wide experience Certificates Close Certificates Open

Certificates Our Environmental Attribute Certificate services help businesses accelerate technology adoption, improve project ROI, and manage claims of renewable energy, energy efficiency and carbon offset 1 carbon offset = 1 tonne of CO₂-e avoided or removed from the atmosphere. Avoided emissions covers activities that alter behaviour that would have otherwise caused emissions such as energy efficiency improvements or avoided deforestation. Removal covers activities that permanently remove CO₂ from the atmosphere such as new forestry plantations, soil carbon improvement or carbon capture and storage.

August 15, 2025 **Articles** Share this article Northmore Gordon and SEEITEK Partner to Deliver Rapid, Cost-Effective Metering & Monitoring Solutions for C&I; **Businesses** Do more with less uncertainty. We're pleased to announce a new Energy Intelligence Partner Alliance between Northmore Gordon and SEEITEK, combining our specialist energy and carbon management expertise with SEEITEK's advanced wireless metering and monitoring technology. This partnership is designed to help commercial and industrial (C&I;) businesses across Australia and the APAC region gain faster, more cost-effective access to accurate energy data – the essential foundation for smarter decisions, reduced costs, and improved sustainability performance. Why the Demand for Better Metering & Monitoring is Growing Energy and sustainability teams are under pressure to:

- See the whole picture – visualise energy use across equipment, sites, and portfolios in real time.
- Eliminate waste quickly – improve efficiency with limited time, staff, and budget.
- Stay compliant – keep pace with tightening rules, including ASRS Australian Sustainability Reporting Standards (ASRS) - Australia's mandatory climate-related financial reporting rules started on 1 January 2025 and are being phased in across three reporting groups.
- Report with confidence – provide accurate, up-to-the-minute data to boards and regulators.
- Scale fast – deploy solutions across multiple buildings or regions without long delays or complex installations.

Without accurate, granular data, even the best-intentioned energy and carbon strategies risk missing opportunities or falling short of compliance. The Power of the Northmore Gordon–SEEITEK Alliance By combining SEEITEK's wireless metering and monitoring technology with our strategic energy and carbon advisory expertise, we deliver:

- Rapid, non-intrusive deployment – avoiding costly and disruptive installation works.
- Granular, real-time data – unlocking the detail needed for accurate audits, feasibility studies, electrification planning, carbon reporting, and demand response.
- AI-powered analytics & custom reporting – tailored dashboards and alerts for decision-makers.
- Third-party data integration – connecting with your existing platforms for a single source of truth.
- Expert design & strategic guidance – from metering plans to system optimisation.
- Scalable solutions – manage multiple buildings or complex portfolios from a single platform.
- Cost Effective – Northmore Gordon partnered with SEEITEK as a recognised cost-effective and rapidly deployed metering and monitoring solutions.

Strategic Benefits for C&I; Clients This isn't just about adding another technology layer. For C&I; operators, it means:

- Lower operational costs – identify and address inefficiencies in days, not months.
- Improved compliance outcomes – accurate

data supports NGERs, ASRS, and other regulatory requirements. • Better project ROI – detailed monitoring enables smarter investment decisions and improved business cases for capital projects. • Future-proofed sustainability – scalable systems that adapt to growing reporting and decarbonisation demands. A “Do More with Less” Advantage In line with our approach to business, this alliance helps clients: • Do more with less downtime – wireless installation means faster deployment and minimal disruption. • Do more with less complexity – one integrated platform, one clear data set. • Do more with less waste – precise insights to cut unnecessary consumption and emissions. • Do more with less risk – high-quality data reduces compliance errors and missed opportunities for certificates or incentives.

Next Steps For organisations aiming to stay competitive while meeting rising regulatory and stakeholder expectations, accurate, real-time energy data is no longer optional – it’s essential. Northmore Gordon and SEEITEK are ready to help you: • Map a tailored metering and monitoring strategy. • Deploy rapidly across one or multiple sites. • Turn data into actionable, cost-saving strategies.
