For governments a net-zero target is one that covers all scope 1 emissions in their jurisdiction. For business it usually covers scope 1 and 2 emissions, although some companies also include some scope 3 emissions. The Science Based Targets Initiative is currently working on a standard for companies. roadmaps, to reduce emissions moREnewable100 (RECs & Offsets) Reach Global Sustainability Goals with Renewable Energy Certificates and Carbon Offsets Trade RECs & Carbon with us Trade Local & International Environmental Attribute Certificates Climate Active Achieve Climate Active Carbon Neutral Certification Net Zero Roadmaps Identify opportunities and build achievable pathways Carbon and Energy Strategy Integrate your carbon and energy strategies NGRS Reporting National Greenhouse Emissions Reporting Grants and Programs Review the latest grants and programs Energy Close Energy Open Energy Energy We offers comprehensive energy services, focusing on efficiency improvements, cost reduction, monitoring, benchmarking and strategic sourcing for sustainable and positive environmental impacts Grants and Program Review the latest grants and programs Energy Audit & Assessments Identify cost and emissions reductions Energy Optimisation Metering & Monitoring, Feasibility Studies, EnMS and ISO50001, & Benchmarking Strategic Energy Sourcing Feasibility & Assessments: Renewables, PPAs or Certificates Compressed Air Services Air Compressor Leak Audits, Surveys and Benchmarking EEO Assessments (SG) Singapore Energy

Don't miss out on Energy Grants – Secure funding for your business Northmore Gordon February 12, 2025 Articles Share this article Rising energy costs are putting pressure on businesses, but there's good news – government grants and rebates can help fund energy efficiency upgrades, reducing costs and improving sustainability. With millions in funding available, are you taking advantage? Applying can feel complex, but we've broken it down into simple steps to maximise your success. Why your business should apply Energy grants don't just cut upfront costs – they deliver long-term benefits, including: Lower energy bills & operating costs Increased profitability & cash flow Improved sustainability & reduced carbon footprint Compliance with energy efficiency regulations Competitive advantage & enhanced brand reputation Latest Grants you should know about How can grants & rebates be used Government funding can help cover: Solar panels & battery storage Energy-efficient lighting & HVAC Heating, ventilation, and air conditioning is the technology of indoor and vehicular environmental comfort. Its goal is to provide thermal comfort and acceptable indoor air quality. upgrades Smart energy management systems Industrial process improvements Electrification & fuel switching Energy audits & feasibility studies Your step-by-step guide to applying 1. Find the right grants Federal and state programs like ARENA, CEFC, and tax rebates offer funding for energy efficiency projects. Visit government sites or consult experts (like Northmore Gordon) to identify the best opportunities. 2. Check your eligibility Each grant has specific criteria – business type, location, and project scope. Make sure you qualify before applying. 3. Get your documents ready Most applications require: Business registration proof Financial statements Energy audit reports Details of your proposed upgrades Having these on hand speeds up the process. 4. Build a strong case A well-structured energy efficiency plan, outlining costs, savings, and sustainability benefits, increases your chances of success. 5. Apply with precision Double-check all details before submitting. Errors or missing info could mean losing out on funding. 6. Follow up After submitting, confirm receipt and stay engaged with the grant provider for updates. How Northmore Gordon can help Navigating grants can be complex, but you don't have to do it alone. Our team of experts helps businesses unlock funding, cut energy costs, and boost sustainability. Let's get started – Talk to us today.
