For governments a net-zero target is one that covers all scope 1 emissions in their jurisdiction. For business it usually covers scope 1 and 2 emissions, although some companies also include some scope 3 emissions. The Science Based Targets Initiative is currently working on a standard for companies. roadmaps, to reduce emissions moREnewable100 (RECs & Offsets) Reach Global Sustainability Goals with Renewable Energy Certificates and Carbon Offsets Trade RECs & Carbon with us Trade Local & International Environmental Attribute Certificates Climate Active Achieve Climate Active Carbon Neutral Certification Net Zero Roadmaps Identify opportunities and build achievable pathways Carbon and Energy Strategy Integrate your carbon and energy strategies NGERS Reporting National Greenhouse Emissions Reporting Grants and Programs Review the latest grants and programs Energy Close Energy Open Energy Energy We offers comprehensive energy services, focusing on efficiency improvements, cost reduction, monitoring, benchmarking and strategic sourcing for sustainable and positive environmental impacts Grants and Program Review the latest grants and programs Energy Audit & Assessments Identify cost and emissions reductions Energy Optimisation Metering & Monitoring, Feasibility Studies, EnMS and ISO50001, & Benchmarking Strategic Energy Sourcing Feasibility & Assessments: Renewables, PPAs or Certificates Compressed Air Services Air Compressor Leak Audits, Surveys and Benchmarking EEO Assessments (SG) Singapore Energy Efficiency Assessments Energy Procurement Navigate energy markets with confidence Virtual

Environmental Manager Leverage our teams wide experience Certificates Close Certificates Open Certificates Certificates Our Environmental Attribute Certificate services help businesses accelerate technology adoption, improve project ROI, and manage claims of renewable energy, energy efficiency and carbon offset 1 carbon offset = 1 tonne of CO₂-e avoided or removed from the atmosphere. Avoided emissions covers activities that alter behaviour that would have otherwise caused emissions such as energy efficiency improvements or avoided deforestation. Removal covers activities that permanently remove CO₂ from the atmosphere such as new forestry plantations, soil carbon improvement or carbon capture and storage. certificates Live Certificate Prices The value of certificates change day-to-day, check today's prices Solar VEECs (VEU PBA) VEU PBA for Large-scale Solar Measurement & Verification (VEU & ESS) M&V; for Large C&I; Efficiency Projects (VEU PBA & ESS PIAM&V;) BESS Calculator Estimate the Peak Reduction Certificate revenue available to your NSW battery project in minutes ERF & Carbon Credit Registration ACCUs for Emission Reduction Projects Boiler Upgrades (VEU & ESS) NSW & VIC Boiler Rebates REC Registration (I-RECs & LGCs) Register renewable assets for I-RECs and LGCs Trade RECs & Carbon with us Trade Local & International Environmental Attribute Certificates moREnewable100 (RECs & Offsets) Reach Global Sustainability Goals with Certificates and Offsets Deemed Certificates (VEU & ESS) NSW & VIC Rebates Global Certificates Environmental Attribute Certificates Australian Programs Australian EAC Programs Case Studies Sectors Articles Team More Close More Open More Northmore Gordon Learn more about Northmore Gordon with the latest news and insights, were to find us, and the extensive terminology used in emissions reductions About Us Who we are & what we do in energy efficiency & decarbonization. Glossary Define key terms in emissions reduction. Earn More from C&I; Solar – What Activity 47 Means for You Madonna Ghajar October 27, 2025 Articles Share this article I'm pleased to share that Northmore Gordon is the first Accredited Person (AP Accredited Provider - a person accredited under the Victorian Essential Services Commission (ESC) to create VEECs for Prescribed Activities.) under the Victorian Energy Upgrades (VEU Victorian Energy Upgrades is a Victorian government energy efficiency program that gives every Victorian household and business the opportunity to receive rebates or discounts on energy saving products.) program to support Activity 47 – Deemed C&I; Solar PV Solar Photovoltaic . This new activity allows VEECs to be created for a much broader range of commercial solar systems in Victoria , opening new revenue opportunities for a wide range of partners – from installers, EPCs, PPA Power Purchase Agreement is a direct agreement between a renewable energy project developer and an end-user for the sale of renewable electricity. Behind the meter, PPAs are commonly used for on-site solar. Off-site PPAs supply renewable energy from projects that are connected to the same electricity grid as the end-user, but can be located anywhere. and lease providers to energy retailers, equipment suppliers, and developers . Our accreditation is effective from 9 October 2025 . If you're delivering commercial solar solutions and want to understand whether your past or future projects qualify, now's the time to get in touch. What is Activity 47? Activity 47 enables VEEC Victorian Energy Efficiency Certificate creation for C&I; solar PV installations between 30 kW and 200 kW . These projects were previously ineligible for VEECs but can now generate upfront deemed certificates , significantly improving project economics. At Northmore Gordon, we also support VEEC creation for larger systems using existing VEU-approved methods: 30–200 kW systems : • Eligible for Deemed VEECs (Activity 47A/47B) • <100 kW systems can also claim STCs Small-scale Technology Certificate under the Australian Renewable Energy Target. More 200–400 kW systems : • Eligible for Streamlined M&V; (SMM4) • Lower evidence burden, faster processing 400 kW–10,000 kW+ systems : • Suitable for Advanced M&V; (PBA Project Based Activities method) • Ideal for complex, high-value installations We are accredited for all VEEC pathways , so no matter the system size, we can support certificate creation and maximise the return. Who Should Be Paying Attention? If you're involved in any part of the commercial solar value chain – including: Installers, EPCs or PPA providers Energy retailers or distributors Consultants or aggregators OEMs and equipment suppliers Financiers and lease providers Project developers or property portfolio managers – this is your

opportunity to unlock additional revenue and create more compelling business cases for your clients. How We Help My team and I can guide you through: Determining project eligibility under Activity 47 and other VEEC pathways Selecting the right method : Deemed, SMM4 or Advanced M&V; Registering VEECs for compliant projects Managing evidence and meeting ESC An energy savings certificate (ESC) is a tradeable certificate created under Division 7 of Part 9 of the Electricity Supply Act 1995. Each ESC represents one notional megawatt hour (MWh) of energy. compliance expectations Stacking VEECs with STCs or LGCs to maximise value We make the process straightforward and compliant, and we'll tailor our support depending on your role in the project. Important Compliance Reminder VEU rules strictly prohibit telemarketing and door knocking . Every VEEC claim must show how the customer lead was generated. If you're unsure about your current approach, we can help review your process to ensure it aligns with the ESC's requirements. Let's Talk If you're working on, financing, supplying or selling commercial solar systems in Victoria, it's worth reviewing whether your current or planned projects could qualify for VEECs – either under Activity 47 or via M&V; pathways. Email me directly at m.ghajar@northmoregordon.com or call 1300 878 500 . We'll help you understand your options and how to get started.
