For governments a net-zero target is one that covers all scope 1 emissions in their jurisdiction. For business it usually covers scope 1 and 2 emissions, although some companies also include some scope 3 emissions. The Science Based Targets Initiative is currently working on a standard for companies. roadmaps, to reduce emissions moREnewable100 (RECs & Offsets) Reach Global Sustainability Goals with Renewable Energy Certificates and Carbon Offsets Trade RECs & Carbon with us Trade Local & International Environmental Attribute Certificates Climate Active Achieve Climate Active Carbon Neutral Certification Net Zero Roadmaps Identify opportunities and build achievable pathways Carbon and Energy Strategy Integrate your carbon and energy strategies NGRS Reporting National Greenhouse Emissions Reporting Grants and Programs Review the latest grants and programs Energy Close Energy Open Energy Energy We offers comprehensive energy services, focusing on efficiency improvements, cost reduction, monitoring, benchmarking and strategic sourcing for sustainable and positive environmental impacts Grants and Program Review the latest grants and programs Energy Audit & Assessments Identify cost and emissions reductions Energy Optimisation Metering & Monitoring, Feasibility Studies, EnMS and ISO50001, & Benchmarking Strategic Energy Sourcing Feasibility & Assessments: Renewables, PPAs or Certificates Compressed Air Services Air Compressor Leak Audits, Surveys and Benchmarking EEO Assessments (SG) Singapore Energy

Avoided emissions covers activities that alter behaviour that would have otherwise caused emissions such as energy efficiency improvements or avoided deforestation. Removal covers activities that permanently remove CO₂ from the atmosphere such as new forestry plantations, soil carbon improvement or carbon capture and storage. certificates Live Certificate Prices The value of certificates change day-to-day, check todays prices Solar VEECs (VEU PBA) VEU PBA for Large-scale Solar Measurement & Verification (VEU & ESS) M&V; for Large C&I; Efficiency Projects (VEU PBA & ESS PIAM&V;) BESS Calculator Estimate the Peak Reduction Certificate revenue available to your NSW battery project in minutes ERF & Carbon Credit Registration ACCUs for Emission Reduction Projects Boiler Upgrades (VEU & ESS) NSW & VIC Boiler Rebates REC Registration (I-RECs & LGCs) Register renewable assets for I-RECs and LGCs Trade RECs & Carbon with us Trade Local & International Environmental Attribute Certificates moREnewable100 (RECs & Offsets) Reach Global Sustainability Goals with Certificates and Offsets Deemed Certificates (VEU & ESS) NSW & VIC Rebates Global Certificates Environmental Attribute Certificates Australian Programs Australian EAC Programs Case Studies Sectors Articles Team More Close More Open More Northmore Gordon Learn more about Northmore Gordon with the latest news and insights, were to find us, and the extensive terminology used in emissions reductions About Us Who we are & what we do in energy efficiency & decarbonization. Glossary Define key terms in emissions reduction. Net-zero will impact your business whether you have a target or not Northmore Gordon February 16, 2021 Articles Share this article What is Net Zero? Net Zero is a commitment to decrease or offset greenhouse gas emissions to zero by a certain year. Most governments around the world have set targets to be net-zero by 2050 , if not at a federal level, then at a local or state level. What does this look like? For a government net-zero means zero direct greenhouse gas emissions for the territory. Some of the policy measures introduced to help achieve these targets are already adding to business costs through increased environmental charges in electricity bills, and this has impacts across your whole supply chain. Carbon border tariffs are starting in the EU in 2023 and the UK is proposing they be introduced globally. What can you do? If your business wants to minimise the increasing impacts that carbon costs will have then you should look at implementing a carbon strategy to manage your risk. If you haven't already started, then some simple steps include: Calculate your full scope 1, 2 and 3 carbon footprint Set a carbon reduction and renewable energy target Introduce a shadow price of carbon into all investment decisions. Why should I act? There is a significant competitive advantage to be gained in preparing your organisation for the transition to the low carbon economy. Future-proofing against increasing carbon price risk Driving innovation across the value chain Saving money through efficiency gains Improving investor confidence. How do I start? Schedule a complimentary carbon strategy review session with us today. We can start you off on the right pathway for a net-zero future. For more information about getting a complimentary review or to speak with us about your net-zero future, contact us at Northmore Gordon or get in touch via email carbon@northmoregordon.com Carbon Emissions , Carbon Strategy , Net Zero , Renewable Energy You may also like: Welcome to our August & September 2026 Compliance Update.
