For governments a net-zero target is one that covers all scope 1 emissions in their jurisdiction. For business it usually covers scope 1 and 2 emissions, although some companies also include some scope 3 emissions. The Science Based Targets Initiative is currently working on a standard for companies. roadmaps, to reduce emissions moREnewable100 (RECs & Offsets) Reach Global Sustainability Goals with Renewable Energy Certificates and Carbon Offsets Trade RECs & Carbon with us Trade Local & International Environmental Attribute Certificates Climate Active Achieve Climate Active Carbon Neutral Certification Net Zero Roadmaps Identify opportunities and build achievable pathways Carbon and Energy Strategy Integrate your carbon and energy strategies NGRS Reporting National Greenhouse Emissions Reporting Grants and Programs Review the latest grants and programs Energy Close Energy Open Energy Energy We offers comprehensive energy services, focusing on efficiency improvements, cost reduction, monitoring, benchmarking and strategic sourcing for sustainable and positive environmental impacts Grants and Program Review the latest grants and programs Energy Audit & Assessments Identify cost and emissions reductions Energy Optimisation Metering & Monitoring, Feasibility Studies, EnMS and ISO50001, & Benchmarking Strategic Energy Sourcing Feasibility & Assessments: Renewables, PPAs or Certificates Compressed Air Services Air Compressor Leak Audits, Surveys and Benchmarking EEO Assessments (SG) Singapore Energy

Avoided emissions covers activities that alter behaviour that would have otherwise caused emissions such as energy efficiency improvements or avoided deforestation. Removal covers activities that permanently remove CO₂ from the atmosphere such as new forestry plantations, soil carbon improvement or carbon capture and storage. certificates Live Certificate Prices The value of certificates change day-to-day, check todays prices Solar VEECs (VEU PBA) VEU PBA for Large-scale Solar Measurement & Verification (VEU & ESS) M&V; for Large C&I; Efficiency Projects (VEU PBA & ESS PIAM&V;) BESS Calculator Estimate the Peak Reduction Certificate revenue available to your NSW battery project in minutes ERF & Carbon Credit Registration ACCUs for Emission Reduction Projects Boiler Upgrades (VEU & ESS) NSW & VIC Boiler Rebates REC Registration (I-RECs & LGCs) Register renewable assets for I-RECs and LGCs Trade RECs & Carbon with us Trade Local & International Environmental Attribute Certificates moREnewable100 (RECs & Offsets) Reach Global Sustainability Goals with Certificates and Offsets Deemed Certificates (VEU & ESS) NSW & VIC Rebates Global Certificates Environmental Attribute Certificates Australian Programs Australian EAC Programs Case Studies Sectors Articles Team More Close More Open More Northmore Gordon Learn more about Northmore Gordon with the latest news and insights, were to find us, and the extensive terminology used in emissions reductions About Us Who we are & what we do in energy efficiency & decarbonization. Powering the future: How we help businesses secure electrification funding Northmore Gordon February 12, 2025 Articles Share this article Switching from gas to electricity is a big move – but the right funding can make it easier. At Northmore Gordon, we identify funding opportunities, navigate the application process, and help businesses unlock financial support to fast-track their energy transition. Ready to make the switch? One of the key programs we recently assisted clients with was the Large Energy User (LEU) Electrification Support Program , a Victorian Government initiative designed to help large energy users reduce their reliance on fossil fuels by transitioning to electricity. The program funded feasibility studies to identify ways for businesses to cut emissions, lower energy costs, and increase energy efficiency through electrification. The results speak for themselves : 40% of all successful facilities were Northmore Gordon clients Over \$600,000 in funding was secured for our clients Sectors represented: Agriculture, Chemicals, Food & Beverage, Animal Processing, and Manufacturing Investigated technologies include hot water & steam heat pumps, electric & electrode boilers, thermal electric storage, and grid connection constraints, among others. Funding programs are a vital support for businesses undertaking electrification projects, with additional grants available for: Solar installations to reduce reliance on fossil fuels Upgrading refrigeration, boilers, and hot water systems to energy-efficient alternatives Electrification of industrial processes to cut costs and emissions Battery storage solutions to enhance energy reliability Beyond funding for feasibility studies, businesses that participated in the LEU Program can use the information gained from the studies as a foundation to undertake Victorian Energy Upgrades (VEU Victorian Energy Upgrades is a Victorian government energy efficiency program that gives every Victorian household and business the opportunity to receive rebates or discounts on energy saving products.) project-based activities and access additional VEU incentives, for eligible projects. These incentives provide further financial support for businesses investing in energy-efficient upgrades, maximising the return on electrification investments. At Northmore Gordon, we're not just about securing funding, we're also experts in environmental certificates, including Victorian Energy Efficiency Certificates (VEECs), which offer additional savings on energy efficiency projects, and we have an experienced team who can help clients manage the implementation of projects through to completion. Looking ahead, we're working closely with clients to build on key learnings from the LEU Program and continue their

electrification journey. New funding opportunities are always emerging, and we're committed to helping businesses secure financial support for their next project. Click to view our grants here . If you're considering an electrification project, don't miss out. Talk to Northmore Gordon today – we'll help you find the right opportunities and maximise your chances of success.
