For governments a net-zero target is one that covers all scope 1 emissions in their jurisdiction. For business it usually covers scope 1 and 2 emissions, although some companies also include some scope 3 emissions. The Science Based Targets Initiative is currently working on a standard for companies. roadmaps, to reduce emissions moREnewable100 (RECs & Offsets) Reach Global Sustainability Goals with Renewable Energy Certificates and Carbon Offsets Trade RECs & Carbon with us Trade Local & International Environmental Attribute Certificates Climate Active Achieve Climate Active Carbon Neutral Certification Net Zero Roadmaps Identify opportunities and build achievable pathways Carbon and Energy Strategy Integrate your carbon and energy strategies NGERS Reporting National Greenhouse Emissions Reporting Grants and Programs Review the latest grants and programs Energy Close Energy Open Energy Energy We offers comprehensive energy services, focusing on efficiency improvements, cost reduction, monitoring, benchmarking and strategic sourcing for sustainable and positive environmental impacts Grants and Program Review the latest grants and programs Energy Audit & Assessments Identify cost and emissions reductions Energy Optimisation Metering & Monitoring, Feasibility Studies, EnMS and ISO50001, & Benchmarking Strategic Energy Sourcing Feasibility & Assessments: Renewables, PPAs or Certificates Compressed Air Services Air Compressor Leak Audits, Surveys and Benchmarking EEO Assessments (SG) Singapore Energy

Unlocking Business Success: The Benefits of Becoming Climate Active Certified Northmore Gordon December 14, 2023 Articles Share this article Australian businesses are increasingly recognising the importance of sustainability and climate responsibility. One of the most impactful ways to demonstrate this commitment is by becoming Climate Active certified . This certification not only aligns your business with national and global climate goals but also brings a host of tangible benefits. In this article, we will delve into the advantages of becoming Climate Active Climate Active is an accreditation program for Australian companies to certify their organisations, products, services, events, buildings or precincts as carbon neutral. The program is backed and administered by the Australian government. Companies have to measure their scope 1, 2 and material scope 3 emissions, reduce where possible and offset the remainder by purchasing and retiring offsets. Allowed offsets are LGCs for scope 2 and ACCUs, CERs, RMUs, VCU or VERs for scope 1 or 3 emissions. Annual reporting is required and published on the Climate Active website. More certified and how it can drive your company towards decarbonisation, reduced energy costs, and enhanced competitiveness. Elevated Reputation and Brand Value In an era where consumers are increasingly mindful of environmental issues, Climate Active certification serves as a powerful symbol of your commitment to sustainability. It enhances your company's reputation and brand value, making it more attractive to eco-conscious consumers. A strong environmental reputation can lead to increased customer loyalty and trust, which can translate into higher sales and long-term success. Cost Savings through Energy Efficiency Energy costs can be a significant expense for businesses. Climate Active certification involves an analysis of your energy usage and emissions. This process often uncovers opportunities to improve energy efficiency. By implementing energy-efficient practices, you can significantly reduce operational costs, contributing directly to improved profitability and financial sustainability. Access to Capital and Investment Opportunities Sustainability has become a key criterion for investors, and Climate Active certification can make your company more attractive to socially responsible investors. This can lead to increased access to capital at favourable terms, enabling you to fund sustainability initiatives and drive growth. Meeting Regulatory Requirements Climate-related regulations are evolving rapidly. By becoming Climate Active certified, you ensure that your business remains aligned with existing and future climate regulations in Australia. This proactive approach helps

you avoid potential penalties and compliance challenges down the road. Improved Supplier and Partner Relations Many suppliers and business partners are also focusing on sustainability. Climate Active certification can strengthen your relationships with suppliers and partners who share your commitment to environmental responsibility. This collaboration can lead to shared goals, streamlined processes, and potential cost savings. Competitive Advantage In a competitive business landscape, differentiation is key. Climate Active certification not only demonstrates your commitment to sustainability but also positions your company as a leader in your industry. This can attract customers and clients who prioritize environmentally responsible partners. Employee Engagement and Talent Attraction Employees increasingly seek purpose-driven workplaces. Climate Active certification signals to your workforce that you are committed to sustainability, boosting employee morale, engagement, and retention. It also makes your business more appealing to top talent looking to work for socially and environmentally responsible organisations Becoming Climate Active certified is not just a badge of honor; it is a strategic decision that can transform your business. It enhances your reputation, reduces energy costs, opens doors to investment opportunities, and ensures regulatory compliance. Moreover, it demonstrates your commitment to addressing climate-related risks and meeting stakeholder expectations. By embarking on the journey towards Climate Active certification with Northmore Gordon, you position your company for long-term success in the evolving business landscape.
