For governments a net-zero target is one that covers all scope 1 emissions in their jurisdiction. For business it usually covers scope 1 and 2 emissions, although some companies also include some scope 3 emissions. The Science Based Targets Initiative is currently working on a standard for companies. roadmaps, to reduce emissions moREnewable100 (RECs & Offsets) Reach Global Sustainability Goals with Renewable Energy Certificates and Carbon Offsets Trade RECs & Carbon with us Trade Local & International Environmental Attribute Certificates Climate Active Achieve Climate Active Carbon Neutral Certification Net Zero Roadmaps Identify opportunities and build achievable pathways Carbon and Energy Strategy Integrate your carbon and energy strategies NGERS Reporting National Greenhouse Emissions Reporting Grants and Programs Review the latest grants and programs Energy Close Energy Open Energy Energy We offers comprehensive energy services, focusing on efficiency improvements, cost reduction, monitoring, benchmarking and strategic sourcing for sustainable and positive environmental impacts Grants and Program Review the latest grants and programs Energy Audit & Assessments Identify cost and emissions reductions Energy Optimisation Metering & Monitoring, Feasibility Studies, EnMS and ISO50001, & Benchmarking Strategic Energy Sourcing Feasibility & Assessments: Renewables, PPAs or Certificates Compressed Air Services Air Compressor Leak Audits, Surveys and Benchmarking EEO Assessments (SG) Singapore Energy Efficiency Assessments Energy Procurement Navigate energy markets with confidence Virtual Environmental Manager Leverage our teams wide experience Certificates Close Certificates Open

Certificates Our Environmental Attribute Certificate services help businesses accelerate technology adoption, improve project ROI, and manage claims of renewable energy, energy efficiency and carbon offset 1 carbon offset = 1 tonne of CO₂-e avoided or removed from the atmosphere. Avoided emissions covers activities that alter behaviour that would have otherwise caused emissions such as energy efficiency improvements or avoided deforestation. Removal covers activities that permanently remove CO₂ from the atmosphere such as new forestry plantations, soil carbon improvement or carbon capture and storage.

Glossary Define key terms in emissions reduction. Who we are and what we do at Northmore Gordon Northmore Gordon February 12, 2025 Articles Share this article We're proud to be a leading provider of environmental certificates and energy efficiency and carbon advisory services. Our mission is to help businesses across Australia lower emissions, reduce energy costs, and embrace sustainability. With decades of expertise, we make navigating the complexities of energy and carbon management simple and rewarding for our clients. Our key capabilities Environmental Certificates: Specialising in LGCs, VEECs, ESCs, ACCUs, I-RECs, and other renewable energy and carbon credit A certificate that is equivalent to 1 tonne CO₂-e. Credits often refer to instruments issued under a cap and trade scheme, where companies are allocated credits up to their emission cap. If they exceed the cap they need to purchase more credits. mechanisms. Advisory Services: Providing tailored advice on energy efficiency projects, certificate eligibility, and regulatory compliance. End-to-End support: Managing the entire process, from opportunity identification to project delivery, certificate trading and value optimisation. Portfolio Management: Helping businesses strategically trade and manage environmental certificates for maximum environmental impact and financial returns. Sectors we work with We support a wide range of industries, each with unique challenges and opportunities: Solar project developers and installers : Reducing your administration by managing project registration, certificate aggregation and certificate sales Animal Processing: Optimising energy use and reducing emissions across the processing lifecycle. Aquatic Centres: Improving energy efficiency in pools, heating systems, and water treatment processes. Built Environment: Helping architects, developers, and property managers create energy-efficient and sustainable buildings. Dairy Processing: Assisting dairy producers in reducing energy consumption while maintaining product quality. Data Centres: Minimising energy use in high-demand data facilities to enhance efficiency. Food & Beverage: Reducing energy costs and improving sustainability practices in production, storage, and distribution. Healthcare: Supporting hospitals and healthcare providers in enhancing energy efficiency without compromising patient care. Industrial Laundries: Cutting energy and water consumption in commercial laundry operations. Manufacturing: Helping manufacturers reduce production costs, emissions, and energy use without sacrificing productivity. Power & Energy: Assisting energy companies in managing emissions reporting and strategies for electrification of fuels, and use of more renewable energy. Steel & Cement: Helping heavy industries lower emissions and improve energy management in resource-intensive processes. Transport & Logistics: Reducing energy consumption and emissions across transport fleets and

logistics operations. Waste Management: Addressing methane emissions, and reporting emissions for Waste management operations. Water & Wastewater: Optimising energy use in water treatment and wastewater management systems. Wood, Paper, and Packaging: Supporting manufacturers in improving energy efficiency and sustainability in production processes. Benefits to clients Partnering with Northmore Gordon offers a host of advantages: Cost Savings: Unlock financial benefits through reduced energy use and optimised environmental certificates. Regulatory Compliance: Stay ahead of government mandates while benefiting from energy and carbon initiatives. Expert Guidance: Access a team of experienced professionals with deep industry knowledge and practical insights. Sustainability Leadership: Strengthen your brand by demonstrating a commitment to reducing emissions. Customised Solutions: Receive tailored strategies that align with your business goals and operational needs. Simplified Processes: We simplify and take responsibility for complex reporting, measurement and verification, saving you time and effort. Real world impact At Northmore Gordon, we measure success by the tangible outcomes we deliver. We've helped manufacturers reduce energy costs, supported councils in achieving carbon reduction targets, and enabled businesses across Australia to take meaningful steps toward sustainability. Let's work together When you work with Northmore Gordon, you're not just meeting compliance requirements – you're taking control of your energy and carbon strategy to achieve real results. Whether you're looking to reduce costs, meet sustainability goals, or gain a competitive edge, we're here to help.
