For governments a net-zero target is one that covers all scope 1 emissions in their jurisdiction. For business it usually covers scope 1 and 2 emissions, although some companies also include some scope 3 emissions. The Science Based Targets Initiative is currently working on a standard for companies. roadmaps, to reduce emissions moREnewable100 (RECs & Offsets) Reach Global Sustainability Goals with Renewable Energy Certificates and Carbon Offsets Trade RECs & Carbon with us Trade Local & International Environmental Attribute Certificates Climate Active Achieve Climate Active Carbon Neutral Certification Net Zero Roadmaps Identify opportunities and build achievable pathways Carbon and Energy Strategy Integrate your carbon and energy strategies NGERS Reporting National Greenhouse Emissions Reporting Grants and Programs Review the latest grants and programs Energy Close Energy Open Energy Energy We offers comprehensive energy services, focusing on efficiency improvements, cost reduction, monitoring, benchmarking and strategic sourcing for sustainable and positive environmental impacts Grants and Program Review the latest grants and programs Energy Audit & Assessments Identify cost and emissions reductions Energy Optimisation Metering & Monitoring, Feasibility Studies, EnMS and ISO50001, & Benchmarking Strategic Energy Sourcing Feasibility & Assessments: Renewables, PPAs or Certificates Compressed Air Services Air Compressor Leak Audits, Surveys and Benchmarking EEO Assessments (SG) Singapore Energy Efficiency Assessments Energy Procurement Navigate energy markets with confidence Virtual Environmental Manager Leverage our teams wide experience Certificates Close Certificates Open

Certificates Our Environmental Attribute Certificate services help businesses accelerate technology adoption, improve project ROI, and manage claims of renewable energy, energy efficiency and carbon offset 1 carbon offset = 1 tonne of CO₂-e avoided or removed from the atmosphere. Avoided emissions covers activities that alter behaviour that would have otherwise caused emissions such as energy efficiency improvements or avoided deforestation. Removal covers activities that permanently remove CO₂ from the atmosphere such as new forestry plantations, soil carbon improvement or carbon capture and storage.

Glossary Define key terms in emissions reduction. Why a Virtual Energy Manager could be the solution Northmore Gordon July 17, 2021 Articles Share this article At Northmore Gordon our focus remains on helping large business reduce energy costs. Our customers are facing more energy cost challenges now than at any time in the past 20 years. We don't need to reiterate the issues here, suffice to say that the current political environment and the broken energy market has resulted in unsustainable energy prices. Something has to give. Will it be you? Your staff? Your business viability? Or can we draw deep on our resourcefulness to improve energy productivity, reduce energy waste, use alternative fuels, and take your business to the next level of energy performance? We would like to think the latter is true. Technology costs are reducing, low-hanging fruit re-grows, and we continue to find cost-effective opportunities to reduce energy costs. Through speaking with our customers, we find that they have three main problems: Corporate targets and budgets for energy and greenhouse gas are not being met. Data is unavailable, or inadequate to manage energy cost There are not enough resources (human or financial) to address energy cost. This is why we introduced a new product to help our customers get the resources they need, address data issues, and achieve their corporate targets. It is called "Virtual Energy Manager", an outsourced support service that is designed to give you direct access to our complete team, and aligns our financial interests with yours. We don't just see ourselves as a service provider, but a partner that is passionately interested in your success. The Virtual Energy Manager provides you with access to the skills of an experienced energy management team without the associated costs. We assist you and your management teams to set and achieve energy productivity goals, comply with energy or greenhouse gas regulations, and create and implement a program of works. At Northmore Gordon, we guarantee quick wins within three months and share the risk and rewards over the life of the program. For more information, check out our Virtual Energy Manager page or contact us directly.
