For governments a net-zero target is one that covers all scope 1 emissions in their jurisdiction. For business it usually covers scope 1 and 2 emissions, although some companies also include some scope 3 emissions. The Science Based Targets Initiative is currently working on a standard for companies. roadmaps, to reduce emissions moREnewable100 (RECs & Offsets) Reach Global Sustainability Goals with Renewable Energy Certificates and Carbon Offsets Trade RECs & Carbon with us Trade Local & International Environmental Attribute Certificates Climate Active Achieve Climate Active Carbon Neutral Certification Net Zero Roadmaps Identify opportunities and build achievable pathways Carbon and Energy Strategy Integrate your carbon and energy strategies NGERs Reporting National Greenhouse Emissions Reporting Grants and Programs Review the latest grants and programs Energy Close Energy Open Energy Energy We offers comprehensive energy services, focusing on efficiency improvements, cost reduction, monitoring, benchmarking and strategic sourcing for sustainable and positive environmental impacts Grants and Program Review the latest grants and programs Energy Audit & Assessments Identify cost and emissions reductions Energy Optimisation Metering & Monitoring, Feasibility Studies, EnMS and ISO50001, & Benchmarking Strategic Energy Sourcing Feasibility & Assessments: Renewables, PPAs or Certificates Compressed Air Services Air Compressor Leak Audits, Surveys and Benchmarking EEO Assessments (SG) Singapore Energy

Glossary Define key terms in emissions reduction. Why Hiring a Consultant is Your Best Bet for Climate Active Certification in Australia Northmore Gordon December 1, 2023 Articles Share this article In the age of climate change, Australian businesses are increasingly recognizing the importance of decarbonizing their operations and reducing energy costs through energy efficiency projects. Climate Active Climate Active is an accreditation program for Australian companies to certify their organisations, products, services, events, buildings or precincts as carbon neutral. The program is backed and administered by the Australian government. Companies have to measure their scope 1, 2 and material scope 3 emissions, reduce where possible and offset the remainder by purchasing and retiring offsets. Allowed offsets are LGCs for scope 2 and ACCUs, CERs, RMUs, VCU or VERs for scope 1 or 3 emissions. Annual reporting is required and published on the Climate Active website. More certification is one of the most reputable ways to demonstrate your commitment to sustainability and carbon neutrality. However, navigating the complex world of carbon accounting and certification can be challenging. That's where consultants like Northmore Gordon come into play. In this article, we'll explore why it's best to engage a consultant to help you become Climate Active certified in Australia. The Road to Climate Active Certification Becoming Climate Active certified is a multi-step process that requires a deep understanding of greenhouse gas emissions, energy efficiency, and sustainability practices. Here's a breakdown of the steps involved: Engage Northmore Gordon as Your Climate Consultant A dedicated certified consultant will be assigned to guide you through the entire carbon neutrality process, offering comprehensive support every step of the way. Register Your Company Upon submitting your registration form, Northmore Gordon takes charge of the application process. Prepares all documentation, submits on your behalf and makes any changes after Climate Active's review. Calculate Your Carbon Footprint One of the pivotal aspects of Climate Active certification is understanding and quantifying your greenhouse gas (GHG Greenhouse gases trap heat in the atmosphere. They all have different global warming potentials (GWP) over different time frames, the higher the number, the worse the impact. For simplicity of accounting everything is referenced back to carbon dioxide which has a global warming potential of 1. There are over 200 GHGs listed in the IPCC fifth assessment report, a sample are below. Note that in current carbon accounting standards the 100 year GWP is used. Greenhouse gas 20 year GWP100 year GWPCarbon dioxide CO₂11Methane

CH4 8428 Hydrofluorocarbon HFC-134a 37101300 Chlorofluorocarbon CFC-116 9004660 Nitrous Oxide N2O 264265 Sulfur hexafluoride SF6 17,500 23,500) emissions. Northmore Gordon's expertise comes into play as they conduct a carbon footprint calculation. This step can be further enhanced by opting for an Energy Audit, which helps identify opportunities to reduce both energy consumption and carbon emissions. Develop a Tailored Reduction Strategy Northmore Gordon creates a customised strategy that aligns with your business goals. This strategy is designed to reduce your environmental impact and help you achieve your emission reduction objectives. Facilitate Validation Validation is a rigorous process that requires meticulous documentation and adherence to Climate Active's stringent standards. Your consultant, Northmore Gordon, guides you through this process, ensuring that all necessary criteria are met. Identify and Purchase Offsets Offsetting unavoidable emissions is a critical component of the certification process. Northmore Gordon assists in identifying appropriate offset projects and facilitates their purchase, ensuring that your carbon neutrality claim is supported by tangible actions. Manage the Certification Process Upon successful validation, Northmore Gordon takes on the responsibility of managing the certification process. This includes overseeing the publication of your public disclosure statement on Climate Active's website. Streamline Annual Compliance Becoming Climate Active certified is an ongoing commitment. Northmore Gordon helps you navigate the annual compliance process, ensuring that your certification remains valid and up-to-date. Why Choose Northmore Gordon? So, why should Australian businesses looking to decarbonize and reduce energy costs choose Northmore Gordon as their consultant for Climate Active certification? Expertise: Northmore Gordon boasts a team of experts with a deep understanding of climate science, energy efficiency, and sustainability practices Comprehensive Support: From start to finish, Northmore Gordon provides comprehensive support, making the certification process seamless and stress-free for businesses Customized Solutions: Every business is unique, and Northmore Gordon tailors their strategies to align with your specific goals and challenges Ongoing Assistance: With Northmore Gordon, your commitment to sustainability doesn't end with certification. They ensure that you remain compliant year after year Achieving Climate Active certification is a testament to your commitment to combat climate change and reduce energy costs in Australia. However, the certification path is complex and requires specialized knowledge and experience. By engaging Northmore Gordon as your climate consultant, you gain a valuable partner on your journey to sustainability, making the process efficient, effective, and successful. Take the first step today and lead your business towards a more sustainable and climate-friendly future. You may also like: ASRS Group 3: are you in scope and don't know it?
