For governments a net-zero target is one that covers all scope 1 emissions in their jurisdiction. For business it usually covers scope 1 and 2 emissions, although some companies also include some scope 3 emissions. The Science Based Targets Initiative is currently working on a standard for companies. roadmaps, to reduce emissions moREnewable100 (RECs & Offsets) Reach Global Sustainability Goals with Renewable Energy Certificates and Carbon Offsets Trade RECs & Carbon with us Trade Local & International Environmental Attribute Certificates Climate Active Achieve Climate Active Carbon Neutral Certification Net Zero Roadmaps Identify opportunities and build achievable pathways Carbon and Energy Strategy Integrate your carbon and energy strategies NGERS Reporting National Greenhouse Emissions Reporting Grants and Programs Review the latest grants and programs Energy Close Energy Open Energy Energy We offers comprehensive energy services, focusing on efficiency improvements, cost reduction, monitoring, benchmarking and strategic sourcing for sustainable and positive environmental impacts Grants and Program Review the latest grants and programs Energy Audit & Assessments Identify cost and emissions reductions Energy Optimisation Metering & Monitoring, Feasibility Studies, EnMS and ISO50001, & Benchmarking Strategic Energy Sourcing Feasibility & Assessments: Renewables, PPAs or Certificates Compressed Air Services Air Compressor Leak Audits, Surveys and Benchmarking EEO Assessments (SG) Singapore Energy Efficiency Assessments Energy Procurement Navigate energy markets with confidence Virtual Environmental Manager Leverage our teams wide experience Certificates Close Certificates Open

Certificates Our Environmental Attribute Certificate services help businesses accelerate technology adoption, improve project ROI, and manage claims of renewable energy, energy efficiency and carbon offset 1 carbon offset = 1 tonne of CO₂-e avoided or removed from the atmosphere. Avoided emissions covers activities that alter behaviour that would have otherwise caused emissions such as energy efficiency improvements or avoided deforestation. Removal covers activities that permanently remove CO₂ from the atmosphere such as new forestry plantations, soil carbon improvement or carbon capture and storage.

Glossary Define key terms in emissions reduction. Kimberly-Clark cleans up with energy savings Case Studies March 28, 2019 Danielle O'Reilly The air handling transportation system was inflexible and inefficient until we upgraded it with variable speed drives and controls. With the help of NGE we were able to verify the savings, and claim energy saving certificates that helped to offset the cost of the new system. Kimberly-Clark , Ingleburn Site Manager The Client Kimberly-Clark, manufacturers health, hygiene, and wellbeing products globally for over 175 countries. Brands include Huggies, U by Kotex, VIVA, Kleenex, Kleenex Cottonelle, Depend, Poise, DryNites, and Pull-Ups and many others. Key Facts Equipment Upgraded 29 large industrial fans and controls Annual Energy Savings Electricity or gas savings or both. 680+ MWh Certificate Value >\$ 105,000 Program NSW Energy Saving Scheme (ESC An energy savings certificate (ESC) is a tradeable certificate created under Division 7 of Part 9 of the Electricity Supply Act 1995. Each ESC represents one notional megawatt hour (MWh) of energy.) Method Project Impact Assessment with M&V; (PIAM&V; Project Impact Assessment with Measurement and Verification) Northmore Gordon Partner Northmore Gordon (Consulting) The Work Based on years of industrial energy experience, Northmore Gordon Environmental was engaged to provide KimberlyClark with an end-to-end energy optimisation solution. The scope of the project was to ensure their energy saving project complied with NSW energy savings scheme requirements and Kimberly-Clark could maximise the financial incentives. Challenges Rapidly rising electricity costs Financial return on investment in energy efficiency upgrades Complexity of accessing the financial incentives of the NSW Energy Saving Scheme (ESS The NSW Energy Savings Scheme (ESS) provides financial incentives to install, improve or replace energy savings equipment and appliances in NSW households and businesses. The ESS was established in 2009. Financial incentives are in the form of tradeable certificates, called energy savings certificates (ESCs). Generally, householders and businesses who fund energy savings activities transfer the right to create ESCs to Accredited Certificate Providers (ACPs) in return for a discount on the cost of the energy savings activity. The MWh savings from the project determines the number of ESCs that can be created. The ESS works by allowing ACPs to create and register ESCs for energy savings that are supported with appropriate evidence. ESCs are then purchased each year by mainly electricity retailers operating in NSW to meet their share of a legislated annual energy savings target.) Outcomes Replaced manual control of air flow dampers with variable speed drives (VSDs) Reduction in ongoing energy costs across the site Saving of more than 7,000 tonnes CO₂e over 10 years Met the payback criteria for site upgrade projects Better control of

the production process A global consumer goods company behind iconic brands including Kleenex, Huggies, and Depend, with a strong presence in the Australian market.
