For governments a net-zero target is one that covers all scope 1 emissions in their jurisdiction. For business it usually covers scope 1 and 2 emissions, although some companies also include some scope 3 emissions. The Science Based Targets Initiative is currently working on a standard for companies. roadmaps, to reduce emissions moREnewable100 (RECs & Offsets) Reach Global Sustainability Goals with Renewable Energy Certificates and Carbon Offsets Trade RECs & Carbon with us Trade Local & International Environmental Attribute Certificates Climate Active Achieve Climate Active Carbon Neutral Certification Net Zero Roadmaps Identify opportunities and build achievable pathways Carbon and Energy Strategy Integrate your carbon and energy strategies NGERS Reporting National Greenhouse Emissions Reporting Grants and Programs Review the latest grants and programs Energy Close Energy Open Energy Energy We offers comprehensive energy services, focusing on efficiency improvements, cost reduction, monitoring, benchmarking and strategic sourcing for sustainable and positive environmental impacts Grants and Program Review the latest grants and programs Energy Audit & Assessments Identify cost and emissions reductions Energy Optimisation Metering & Monitoring, Feasibility Studies, EnMS and ISO50001, & Benchmarking Strategic Energy Sourcing Feasibility & Assessments: Renewables, PPAs or Certificates Compressed Air Services Air Compressor Leak Audits, Surveys and Benchmarking EEO Assessments (SG) Singapore Energy Efficiency Assessments Energy Procurement Navigate energy markets with confidence Virtual Environmental Manager Leverage our teams wide experience Certificates Close Certificates Open

Certificates Our Environmental Attribute Certificate services help businesses accelerate technology adoption, improve project ROI, and manage claims of renewable energy, energy efficiency and carbon offset 1 carbon offset = 1 tonne of CO₂-e avoided or removed from the atmosphere. Avoided emissions covers activities that alter behaviour that would have otherwise caused emissions such as energy efficiency improvements or avoided deforestation. Removal covers activities that permanently remove CO₂ from the atmosphere such as new forestry plantations, soil carbon improvement or carbon capture and storage.

This grant forms part of the broader \$10M+ upgrade to the iconic community facility, aimed at delivering long-term energy efficiency, emissions reduction and operational savings. Northmore Gordon's role in the success: • Provided a technical review of electrification options and delivered recommendations on a decarbonisation pathway • Compiled a list of projects with outcomes aligned to Community Energy Upgrades Fund objectives (quantifying GHG Greenhouse gases trap heat in the atmosphere. They all have different global warming potentials (GWP) over different time frames, the higher the number, the worse the impact. For simplicity of accounting everything is referenced back to carbon dioxide which has a global warming potential of 1. There are over 200 GHGs listed in the IPCC fifth assessment report, a sample are below. Note that in current carbon accounting standards the 100 year GWP is used. Greenhouse gas 20 year GWP100 year GWPCarbon dioxide CO₂11Methane CH₄8428Hydrofluorocarbon HFC-134a37101300Chlorofluorocarbon CFC-1169004660Nitrous Oxide N₂O264265Sulfur hexafluoride SF₆17,50023,500 reduction, energy savings Electricity or gas savings or both. , public benefit) • Collaborated with council to translate technical detail into a compelling, fundable grant application • Ensured the proposed solution stacked funding pathways with asset renewal plans The project will switch pool and space heating systems from gas to efficient electric heat pumps, contributing to significant emissions reductions and energy savings while improving resilience and comfort for the community. **Why it matters:** • Community infrastructure plays a key role in achieving decarbonisation targets • Strategic electrification reduces energy costs and eliminates gas reliance • Strong partnerships turn technical complexity into funded outcomes **Want to electrify your community assets and win federal funding?** Speak with a Northmore Gordon senior advisor today and get direct access to real expertise. **Energy Efficiency** , **Energy Upgrade** , **GHG** , **Heat Pumps** , **Northmore Gordon** You may also like: **Welcome to our August & September 2026 Compliance Update.** **Australian Certificate Markets – August 2026 Update** **Where's the value in renewable heat?** **Latest Updates** **ASRS Group 3: are you in scope and don't know it?** **Correct as at 13 September 2026.** If your company is a large proprietary company, you may be legally required to report under Australia's mandatory climate **Read More »** **Beyond annual matching: The evolution of time-stamped RECs** **For**

more than a decade, Renewable Energy Certificates (RECs)-RECs, GOs, TIGRs Tradeable Instrument for Global Renewables (TIGR) Registry is an online platform for tracking and transferring renewable energy certificates (RECs), enabling developers to generate, verify and sell RECs. The registry is run by APX, a US company that provides infrastructure for environmental markets around the world. , LGCs, ZNECs, J-Credits) have underpinned global renewable electricity procurement.
