For governments a net-zero target is one that covers all scope 1 emissions in their jurisdiction. For business it usually covers scope 1 and 2 emissions, although some companies also include some scope 3 emissions. The Science Based Targets Initiative is currently working on a standard for companies. roadmaps, to reduce emissions moREnewable100 (RECs & Offsets) Reach Global Sustainability Goals with Renewable Energy Certificates and Carbon Offsets Trade RECs & Carbon with us Trade Local & International Environmental Attribute Certificates Climate Active Achieve Climate Active Carbon Neutral Certification Net Zero Roadmaps Identify opportunities and build achievable pathways Carbon and Energy Strategy Integrate your carbon and energy strategies NGERS Reporting National Greenhouse Emissions Reporting Grants and Programs Review the latest grants and programs Energy Close Energy Open Energy Energy We offers comprehensive energy services, focusing on efficiency improvements, cost reduction, monitoring, benchmarking and strategic sourcing for sustainable and positive environmental impacts Grants and Program Review the latest grants and programs Energy Audit & Assessments Identify cost and emissions reductions Energy Optimisation Metering & Monitoring, Feasibility Studies, EnMS and ISO50001, & Benchmarking Strategic Energy Sourcing Feasibility & Assessments: Renewables, PPAs or Certificates Compressed Air Services Air Compressor Leak Audits, Surveys and Benchmarking EEO Assessments (SG) Singapore Energy Efficiency Assessments Energy Procurement Navigate energy markets with confidence Virtual Environmental Manager Leverage our teams wide experience Certificates Close Certificates Open

Certificates Our Environmental Attribute Certificate services help businesses accelerate technology adoption, improve project ROI, and manage claims of renewable energy, energy efficiency and carbon offset 1 carbon offset = 1 tonne of CO2-e avoided or removed from the atmosphere.

Avoided emissions covers activities that alter behaviour that would have otherwise caused emissions such as energy efficiency improvements or avoided deforestation. Removal covers activities that permanently remove CO2 from the atmosphere such as new forestry plantations, soil carbon improvement or carbon capture and storage.

Northmore Gordon September 18, 2025 News Share this article We're pleased to announce a new strategic partnership with Sundream Energy, a respected leader in South Korea's solar industry with more than 20 years of experience in project development and delivery. Sundream Energy brings deep local knowledge, technical expertise, and a strong network of solar installers and project owners across Korea. This partnership allows us to offer Korean solar system owners greater access to environmental certificate markets – particularly Renewable Energy Certificates (RECs I-RECs, GOs, TIGRs, LGCs, ZNECs, J-Credits) – through simplified, hands-on support. By joining forces, Northmore Gordon and Sundream Energy help unlock the financial value of clean energy assets and through selling RECs to international and local companies, support corporate decarbonisation goals. At Northmore Gordon, we specialise in helping solar partners turn generation into long-term financial returns through:

- Registering solar power stations under local and international certificate schemes
- Creating Renewable Energy Certificates (RECs) such as I-RECs and local equivalents
- Trading and selling RECs to corporate buyers committed to clean energy sourcing
- Retiring RECs and carbon credits to support verified carbon reporting and sustainability targets
- Building REC Renewable Energy Certificate portfolios that improve returns for renewable assets

With over 15 years of experience working across the Asia Pacific, our team offers practical support – without layers of red tape. We act as a bridge between renewable asset owners and certificate markets, ensuring every megawatt hour of clean energy is recognised. This partnership with Sundream Energy marks another step in our commitment to building a more connected, efficient, and financially rewarding clean energy ecosystem in Asia-Pacific. If you're a solar EPC, installer, or asset owner looking to register projects or monetise RECs now is the time to connect. Let's build value together. Call or email Meilin Wu –
