For governments a net-zero target is one that covers all scope 1 emissions in their jurisdiction. For business it usually covers scope 1 and 2 emissions, although some companies also include some scope 3 emissions. The Science Based Targets Initiative is currently working on a standard for companies. roadmaps, to reduce emissions moREnewable100 (RECs & Offsets) Reach Global Sustainability Goals with Renewable Energy Certificates and Carbon Offsets Trade RECs & Carbon with us Trade Local & International Environmental Attribute Certificates Climate Active Achieve Climate Active Carbon Neutral Certification Net Zero Roadmaps Identify opportunities and build achievable pathways Carbon and Energy Strategy Integrate your carbon and energy strategies NGRS Reporting National Greenhouse Emissions Reporting Grants and Programs Review the latest grants and programs Energy Close Energy Open Energy Energy We offers comprehensive energy services, focusing on efficiency improvements, cost reduction, monitoring, benchmarking and strategic sourcing for sustainable and positive environmental impacts Grants and Program Review the latest grants and programs Energy Audit & Assessments Identify cost and emissions reductions Energy Optimisation Metering & Monitoring, Feasibility Studies, EnMS and ISO50001, & Benchmarking Strategic Energy Sourcing Feasibility & Assessments: Renewables, PPAs or Certificates Compressed Air Services Air Compressor Leak Audits, Surveys and Benchmarking EEO Assessments (SG) Singapore Energy Efficiency Assessments Energy Procurement Navigate energy markets with confidence Virtual Environmental Manager Leverage our teams wide experience Certificates Close Certificates Open Certificates Certificates Our Environmental Attribute Certificate services help businesses accelerate technology adoption, improve project ROI, and manage claims of renewable energy, energy efficiency and carbon offset 1 carbon offset = 1 tonne of CO2-e avoided or removed

from the atmosphere. Avoided emissions covers activities that alter behaviour that would have otherwise caused emissions such as energy efficiency improvements or avoided deforestation. Removal covers activities that permanently remove CO₂ from the atmosphere such as new forestry plantations, soil carbon improvement or carbon capture and storage. certificates Live Certificate Prices The value of certificates change day-to-day, check today's prices Solar VEECs (VEU PBA) VEU PBA for Large-scale Solar Measurement & Verification (VEU & ESS) M&V; for Large C&I; Efficiency Projects (VEU PBA & ESS PIAM&V;) BESS Calculator Estimate the Peak Reduction Certificate revenue available to your NSW battery project in minutes ERF & Carbon Credit Registration ACCUs for Emission Reduction Projects Boiler Upgrades (VEU & ESS) NSW & VIC Boiler Rebates REC Registration (I-RECs & LGCs) Register renewable assets for I-RECs and LGCs Trade RECs & Carbon with us Trade Local & International Environmental Attribute Certificates moREnewable100 (RECs & Offsets) Reach Global Sustainability Goals with Certificates and Offsets Deemed Certificates (VEU & ESS) NSW & VIC Rebates Global Certificates Environmental Attribute Certificates Australian Programs Australian EAC Programs Case Studies Sectors Articles Team More Close More Open More Northmore Gordon Learn more about Northmore Gordon with the latest news and insights, were to find us, and the extensive terminology used in emissions reductions About Us Who we are & what we do in energy efficiency & decarbonization. Singapore NG helps you increase your energy productivity View All Singapore Grants EEO Assessments Strategic Energy Sourcing Corporate Energy and Carbon Management Energy and Carbon Certificates Technical Services EEO Assessments EEO Assessment EEO Assessments are required for existing operations and plant expansions where you use (or project to use) > 54TJ annum. Northmore Gordon: Single point of contact: Industrial energy specialists covering processes and facilities Singapore Certified EEO Assessors x 3 Singapore Accredited ESCO Singapore SCEM Certified M&V; Professionals x 8 ISO 9001 certified >20 Industrial Energy specialists We have experience in EEO for large industrial companies in Singapore and Australia. Get in touch Meet the team Strategic Energy Sourcing Strategic Energy Sourcing These days buying energy services is not just about reducing cost. Contract strategies must meet corporate risk limits, contribute to the organisation's sustainability goals, and include optimisation of the physical assets of a company with financial instruments. Strategic energy sourcing and contract support Customised procurement strategies Energy supply contract review Consolidate multi-site data for tendering Negotiation with energy retailers for optimal price structure Identification of wholesale market opportunities Identification and monetisation of demand response opportunities Renewable energy and carbon credit A certificate that is equivalent to 1 tonne CO₂-e. Credits often refer to instruments issued under a cap and trade scheme, where companies are allocated credits up to their emission cap. If they exceed the cap they need to purchase more credits. More procurement for meeting voluntary corporate targets Energy efficiency as a service Bill validation and audit Validate bills and over-charges Analyse load profiles Strategies for cost savings Reporting and data management Data management Data visualisation Performance against KPIs Get in touch Contact an expert Corporate Energy and Carbon Management Corporate Energy and Carbon Management Strategic Energy and Greenhouse Gas Advice Best practice requires your management team to have a good framework for managing energy and carbon, and a roadmap on how to improve. Energy and Greenhouse Strategy development Energy supply risks and mitigation strategies Carbon reduction plans and Carbon offset 1 carbon offset = 1 tonne of CO₂-e avoided or removed from the atmosphere. Avoided emissions covers activities that alter behaviour that would have otherwise caused emissions such as energy efficiency improvements or avoided deforestation. Removal covers activities that permanently remove CO₂ from the atmosphere such as new forestry plantations, soil carbon improvement or carbon capture and storage. More strategies Integrated energy procurement and demand strategy Carbon accounting Carbon footprinting of products and services Sustainability Reporting such as TCFD The Task Force on Climate-related Financial Disclosures (TCFD) is an industry-led effort, chaired by Michael Bloomberg, with 32 global expert members from the private

sector. The TCFD recommendations are designed to solicit consistent, decision-useful, forward-looking information on the material financial impacts of climate-related risks and opportunities, including those related to the global transition to a lower-carbon economy. , GRI and CDP Energy Management Systems Energy Management Diagnostic: Our industry-leading diagnostic tool will benchmark your current performance, and give you a clear set of actions.
