For governments a net-zero target is one that covers all scope 1 emissions in their jurisdiction. For business it usually covers scope 1 and 2 emissions, although some companies also include some scope 3 emissions. The Science Based Targets Initiative is currently working on a standard for companies. roadmaps, to reduce emissions moREnewable100 (RECs & Offsets) Reach Global Sustainability Goals with Renewable Energy Certificates and Carbon Offsets Trade RECs & Carbon with us Trade Local & International Environmental Attribute Certificates Climate Active Achieve Climate Active Carbon Neutral Certification Net Zero Roadmaps Identify opportunities and build achievable pathways Carbon and Energy Strategy Integrate your carbon and energy strategies NGRS Reporting National Greenhouse Emissions Reporting Grants and Programs Review the latest grants and programs Energy Close Energy Open Energy Energy We offers comprehensive energy services, focusing on efficiency improvements, cost reduction, monitoring, benchmarking and strategic sourcing for sustainable and positive environmental impacts Grants and Program Review the latest grants and programs Energy Audit & Assessments Identify cost and emissions reductions Energy Optimisation Metering & Monitoring, Feasibility Studies, EnMS and ISO50001, & Benchmarking Strategic Energy Sourcing Feasibility & Assessments: Renewables, PPAs or Certificates Compressed Air Services Air Compressor Leak Audits, Surveys and Benchmarking EEO Assessments (SG) Singapore Energy Efficiency Assessments Energy Procurement Navigate energy markets with confidence Virtual Environmental Manager Leverage our teams wide experience Certificates Close Certificates Open Certificates Certificates Our Environmental Attribute Certificate services help

businesses accelerate technology adoption, improve project ROI, and manage claims of renewable energy, energy efficiency and carbon offset 1 carbon offset = 1 tonne of CO₂-e avoided or removed from the atmosphere. Avoided emissions covers activities that alter behaviour that would have otherwise caused emissions such as energy efficiency improvements or avoided deforestation. Removal covers activities that permanently remove CO₂ from the atmosphere such as new forestry plantations, soil carbon improvement or carbon capture and storage. certificates Live Certificate Prices The value of certificates change day-to-day, check today's prices Solar VEECs (VEU PBA) VEU PBA for Large-scale Solar Measurement & Verification (VEU & ESS) M&V; for Large C&I; Efficiency Projects (VEU PBA & ESS PIAM&V;) BESS Calculator Estimate the Peak Reduction Certificate revenue available to your NSW battery project in minutes ERF & Carbon Credit Registration ACCUs for Emission Reduction Projects Boiler Upgrades (VEU & ESS) NSW & VIC Boiler Rebates REC Registration (I-RECs & LGCs) Register renewable assets for I-RECs and LGCs Trade RECs & Carbon with us Trade Local & International Environmental Attribute Certificates moREnewable100 (RECs & Offsets) Reach Global Sustainability Goals with Certificates and Offsets Deemed Certificates (VEU & ESS) NSW & VIC Rebates Global Certificates Environmental Attribute Certificates Australian Programs Australian EAC Programs Case Studies Sectors Articles Team More Close More Open More Northmore Gordon Learn more about Northmore Gordon with the latest news and insights, were to find us, and the extensive terminology used in emissions reductions About Us Who we are & what we do in energy efficiency & decarbonization. Glossary Define key terms in emissions reduction. Solar PV Small scale Solar power continues to boom across all Australia with more and more businesses and homes receiving rebates for solar installation to combat high energy prices. What we'll be covering Why choose Northmore Gordon as your partner? System Eligibility for Solar PV Exceeding 100 kW? What are the rebates worth? Solar PV for Residential Customers At Northmore Gordon, we aim to make it easier for the customer and our partners to comply with the scheme requirements and be rewarded for their effort – we know what is required and how to get you there. Our team will work closely with you, providing responsive and reliable project management, along with the peace of mind from fraudulent installs. Talk to us about how unlocking rebates can increase sales, improve ROI and have a significant effect on your bottom line. Get In Touch "Residential solar power continues to boom across all Australian States with more and more businesses and homes looking for solar rebates and solar installation to combat high energy prices" Hamish McGovern, Group Director – Northmore Gordon Tweet Why choose Northmore Gordon as your partner? Northmore Gordon's app provides solar panel validation to ensure no risk of ineligible technologies Simplest evidence collection Fast payback options Lock-in prices A single, dedicated compliance officer Industry-leading expertise Personal assistance to minimise paperwork System Eligibility for Solar PV Under the Federal Renewable Energy Target for Solar Photovoltaic (PV Solar Photovoltaic) eligible small-scale renewable energy systems may be entitled to rebates for panels up to and including 100kW. Solar PV Systems are eligible to both residential and commercial addresses. Please note, the solar PV panels and inverters must be Clean Energy Council approved at the time of installation. CEC approved modules CEC approved inverters CEC approved batteries Exceeding 100 kW? If your solar system is larger than 100 kW it will be classified as a Power Station and could be eligible for LGCs under the Large-scale Renewable Energy Target alternatively, in Victoria, you can claim under the VEU Victorian Energy Upgrades is a Victorian government energy efficiency program that gives every Victorian household and business the opportunity to receive rebates or discounts on energy saving products. program, and receive more than double the funding from LGCs (and much much sooner) see more here. What are the rebates worth? Here is an example of a solar PV system payback – To get a more detailed understanding of payback call us today to walk you through your options. Solar PV System With Government Program and Tax Cut Solar PV System (approx.) \$9,000 incl. install fee Average Daily Energy Usage Production = 22-24 kWh*** Energy Certificate Rebate \$2,900 (approx.) Solar VIC rebate (if applicable) \$1,850 Solar PV for Residential Customers There are three main solar incentives available to Australian residential households. State Government Schemes

e.g. the Victorian Solar Homes Program Federal Government e.g. the Small Scale Renewable Energy Scheme Electricity Retailers, offer feed in tariffs for excess generation Example of how much you could get back for a 6.6kW system installed City Approx. STC Small-scale Technology Certificate under the Australian Renewable Energy Target. More Value** Melbourne \$2,808 Sydney \$3,276 Brisbane \$3,276 Darwin \$3,636 Perth \$3,276 Adelaide \$3,276 Hobart \$2808 Canberra \$3,276 **Based on 6.6kW system, example from solarcalculator.com.au The paybacks differ depending on your location, available incentive(s) and power generated. Talk to your installer or make it easy and get them to talk to us. We take the hassle out of unlocking incentives and rebates so you can get on with your day.

Request Pricing Applicable Building / Sites Residential Buildings Small to Medium Businesses Commercial Buildings Industrial Sites Applicable States All States (Renewable Energy Target) Key Person Calvin Flores Audit & Compliance Lead Calvin is the Lead for the Audit and Compliance Team. He has worked in the BPO industry for nine years, leading a number of teams to success. Calvin holds a degree in AB Philosophy & Human Resources Development. Contact Calvin Related Links STC Calculator Clean Energy Regulator The Clean Energy Regulator is the Australia Government body responsible for accelerating carbon abatement for Australia through the administration of the National Greenhouse and Energy Reporting scheme, Renewable Energy Target and the Emissions Reduction Fund. More Small-scale Scheme Partner with us Frequently Asked Questions Are solar rebates still available? Depending on what state you are in will depend on what upgrades and incentives you have access to. Talk to us about what options and programs are best for your next energy efficiency project. How do you qualify for a solar rebate? To qualify for a solar incentive your PV system must: – use approved panels and inverters – use a Clean Energy Council (CEC The Clean Energy Council (CEC) is the peak body for the clean energy industry in Australia. It is a not-for-profit, membership-based organisation. It represents and works with Australia's leading renewable energy and energy storage businesses, as well as rooftop solar installers, to further the development of clean energy in Australia.) accredited designer and installer – have a capacity less than 100kW What types of incentives can I get for Solar PV? In Australia there are a number of incentives available for Solar PV: – The federal Small Scale Renewable Energy Scheme that created tradable STCs – State rebate programs such as Victorian Solar Homes – Feed in Tariffs from your electricity retailer. There may be other local incentives for solar in your area and you may be able to access more than one financial incentive to reduce the cost of your system. How do I apply for a Victorian Solar Homes rebate? To apply for the Victorian Solar Homes Rebate you need to register with Solar Vic before you have your system installed, for more information go to <https://www.solar.vic.gov.au/how-to-apply> How do I start the process of claiming energy certificates? In you are a solar installer, talk to Northmore Gordon today about how we can help you access the various financial incentives on offer for solar PV installation. What is Solar Panel Validation? Solar Panel Validation (SPV) Initiative is a tool developed by the Clean Energy Regulator to give consumers a way to validate PV panels and confirm they: – have manufacturer warranties – meet Australian Standards for quality and performance – are eligible for STCs By participating in the SPV initiative we are able to offer faster turnaround times and better pricing for your STCs. Northmore Gordon partners with businesses involved in solar upgrades who wish to access the energy efficiency incentives under the state-based schemes. Northmore Gordon partners with both energy efficiency installation companies, electricians, equipment suppliers and end businesses performing upgrades.
