For governments a net-zero target is one that covers all scope 1 emissions in their jurisdiction. For business it usually covers scope 1 and 2 emissions, although some companies also include some scope 3 emissions. The Science Based Targets Initiative is currently working on a standard for companies. roadmaps, to reduce emissions moREnewable100 (RECs & Offsets) Reach Global Sustainability Goals with Renewable Energy Certificates and Carbon Offsets Trade RECs & Carbon with us Trade Local & International Environmental Attribute Certificates Climate Active Achieve Climate Active Carbon Neutral Certification Net Zero Roadmaps Identify opportunities and build achievable pathways Carbon and Energy Strategy Integrate your carbon and energy strategies NGERs Reporting National Greenhouse Emissions Reporting Grants and Programs Review the latest grants and programs Energy Close Energy Open Energy Energy We offers comprehensive energy services, focusing on efficiency improvements, cost reduction, monitoring, benchmarking and strategic sourcing for sustainable and positive environmental impacts Grants and Program Review the latest grants and programs Energy Audit & Assessments Identify cost and emissions reductions Energy Optimisation Metering & Monitoring, Feasibility Studies, EnMS and ISO50001, & Benchmarking Strategic Energy Sourcing Feasibility & Assessments: Renewables, PPAs or Certificates Compressed Air Services Air Compressor Leak Audits, Surveys and Benchmarking EEO Assessments (SG) Singapore Energy Efficiency Assessments Energy Procurement Navigate energy markets with confidence Virtual Environmental Manager Leverage our teams wide experience Certificates Close Certificates Open Certificates Certificates Our Environmental Attribute Certificate services help

businesses accelerate technology adoption, improve project ROI, and manage claims of renewable energy, energy efficiency and carbon offset 1 carbon offset = 1 tonne of CO₂-e avoided or removed from the atmosphere. Avoided emissions covers activities that alter behaviour that would have otherwise caused emissions such as energy efficiency improvements or avoided deforestation. Removal covers activities that permanently remove CO₂ from the atmosphere such as new forestry plantations, soil carbon improvement or carbon capture and storage.

[Northmore Gordon](#) Learn more about Northmore Gordon with the latest news and insights, were to find us, and the extensive terminology used in emissions reductions [About Us](#) Who we are & what we do in energy efficiency & decarbonization. [Locations](#) Find our offices near you. [Contact Us](#) Get in touch with our team. [Careers](#) Join our team making a sustainability difference [Articles](#) Learn about energy efficiency & carbon reduction. [Latest News](#) Stay informed on industry developments. [Government Updates](#) Track policy changes impacting your energy use. [Accreditations](#) See our certifications for trusted service. [Glossary](#) Define key terms in emissions reduction. [Energy & Sustainability Tools and Calculators](#) Explore our practical tools and calculators to estimate certificate eligibility, rebates, scheme benefits and approved products across Australia's energy efficiency and renewable energy programs. Use these resources to get an indication of potential outcomes and make more informed decisions about your energy projects. Welcome to our Northmore Gordon tools and calculators section Please use the tools below to help you calculate and estimate information on scheme prices, rebates and approved products. Please note the results from our tools should be used as an indication only. For any further information or details contact Northmore Gordon directly. [BESS Calculator](#) Estimate the Peak Reduction Certificate revenue available to your NSW battery project in minutes [Calculate STC Calculator](#) Calculate the number small-scale technology certificates (STCs [Small-scale Technology Certificate](#) under the Australian Renewable Energy Target. [More](#)) for small generation units you could be eligible for with our [STC Calculator](#). [Calculate VEEC Calculator](#) Are you looking to do a Victorian Upgrade? Find out how many VEECs you could be eligible for by using our [VEEC Victorian Energy Efficiency Certificate calculator](#). [Calculate ESS Approved Products Search](#) Search the ESS The NSW Energy Savings Scheme (ESS) provides financial incentives to install, improve or replace energy savings equipment and appliances in NSW households and businesses. The ESS was established in 2009. Financial incentives are in the form of tradeable certificates, called energy savings certificates (ESCs). Generally, householders and businesses who fund energy savings activities transfer the right to create ESCs to Accredited Certificate Providers (ACPs) in return for a discount on the cost of the energy savings activity. The MWh savings from the project determines the number of ESCs that can be created. The ESS works by allowing ACPs to create and register ESCs for energy savings that are supported with appropriate evidence. ESCs are then purchased each year by mainly electricity retailers operating in NSW to meet their share of a legislated annual energy savings target. [Portal of approved products](#) to find out if your product is eligible to create ESCs. Search below. [Search VEU Approved Products Search](#) Search the VEU registry of approved products to find out if your product is eligible to create VEECs. Search below.
